

UKWISHAKA

Software Engineer

Kigali, Rwanda | 0793329512 | sandrineukwishaka6@gmail.com | github.com/kwishaka

SUMMARY

Final-year Information Management Systems student at the Adventist University of Central Africa with hands-on experience designing and shipping full-stack applications. Comfortable across the stack — Java/Spring Boot APIs, React frontends, relational databases, and cloud deployment — with a track record of debugging complex production issues end to end.

EXPERIENCE

Intern | Umwarimu SACCO

- Developed the Employee Management System (Spring Boot + React), a full-stack application for managing employee records and job applications end to end.
- Built and secured a REST API with role-based access control (JWT authentication), file upload handling, and automated email notifications.
- Deployed and maintained the application on Railway, resolving database persistence, environment configuration, and CI/deployment issues.
- Published interactive API documentation using Fern and maintained a clean Git branching workflow across a multi-feature codebase.

PROJECTS

Employee Management System (AUCAEmployeeMIS) | Spring Boot, React, PostgreSQL, Railway, Fern

- Designed and implemented a full-stack employee/application management platform with secure authentication, file uploads, and an admin dashboard.
- Diagnosed and fixed backend issues spanning persistence, enum mapping, security context, and cross-environment configuration.
- Repos: github.com/kwishaka/employee_management_system (backend), github.com/kwishaka/employee_management_frontend (frontend).

Uber Fares Data Analysis | Python, Pandas, Power BI

- Analyzed Uber fare trip data to surface fare and demand trends using Python and Pandas.
- Built interactive Power BI dashboards to visualize findings for non-technical stakeholders.

Student Database Management System | Oracle, MySQL, PL/SQL

- Designed and implemented a relational database schema for managing student records.
- Wrote PL/SQL procedures and queries to handle core data operations and reporting.

SKILLS

Languages: Java, Python, SQL, PL/SQL, JavaScript

Frameworks & Tools: Spring Boot, React, Vite, Git/GitHub, Railway, Fern, REST APIs

Data & Analysis: Pandas, Power BI, database design

Concepts: JWT authentication, password hashing (bcrypt), REST API design, Git branching workflows

EDUCATION

BSc, Information Management Systems | Adventist University of Central Africa (AUCA), Kigali, Rwanda 2023 – 2027

GPA: 13.16
